

## Evaluation: VR Math Space

### Topic: Solving Linear Equations

|  | Applies | Applies to some extent | Partially applies | Applies to a lesser extent | Does not apply | No statement |
|--|---------|------------------------|-------------------|----------------------------|----------------|--------------|
| I was able to solve linear equations before this lesson.                         |         |                        |                   |                            |                |              |
| The task format has helped me to solve linear equations better.                  |         |                        |                   |                            |                |              |
| The task format has helped me to understand transformations in equations better. |         |                        |                   |                            |                |              |
| I enjoyed the task format.   |         |                        |                   |                            |                |              |
| I would like to work with VR more often.   |         |                        |                   |                            |                |              |
| I find the format for mathematics lessons meaningful.                            |         |                        |                   |                            |                |              |

1. What did you like about the task format?

---

---

---

2. What did you not like about the task format?

---

---

---

3. For which tasks could VR be used in mathematics lessons?

---

---

---
